

DP 4010

4 MOTORIZED COLUMN
PEDIATRIC BED

We are pleased to introduce our new DP 4010 – a more advanced and comprehensive version of our well-established DP 2010 model. The DP 4010 4-Motorized Column Pediatric Bed is specifically designed to ensure both maximum visibility and safety for pediatric patients, featuring plexiglass transparent side rails that offer clear visibility while providing secure protection. This model is engineered with long-term use in mind, offering exceptional durability, functionality, and ergonomic comfort for both patients and caregivers. The four-motorized column structure enables smooth and precise adjustments, supporting a wide range of clinical needs in pediatric care settings. Backrest, kneerest, height, Trendelenburg and Anti-trendelenburg movements are electronic. With its stylish appearance, it is designed for safety and comfort according to EN 60601-2-52 Standard.
