Gynecology

PRODUCT DESCRIPTION

The Trinodal DG 1010 is a fixed-height, manually adjustable gynecological examination table designed for positioning and supporting patients during gynecological examinations and related non-surgical clinical procedures.

The backrest, seat and foot sections are independently adjusted through manual gradual mechanical mechanisms, allowing healthcare professionals to configure the patient support surface according to examination requirements.

The DG 1010 is designed for professional indoor healthcare environments and requires no electrical power.

SPECIFICATIONS
